

SERVICES MEMORY LOGGING

Maximize your results with Lonkar memory logging and troubleshoot any type of wellbore, whether you deal with shallow, conventional or CBM gas, light or heavy oil. Our tools and analysis capabilities accurately define, measure and interpret the variables you need to make decisions about the future of your assets.

- > Production logging:
 - > Inflow profile
 - > Fluid entry identification
 - > Artificial lift evaluation
 - > Stimulation logging
- > Casing / tubing inspection
- > Frac tracer / spectral gamma ray logging
- > Digital borehole camera services
- > Storage cavern product interface identification
