

SPECIALTY DATA SERVICES SURFACE DATA APPLICATIONS

Maximize your results with Lonkar's data management services! Our highly trained teams and expert on-site instrumentation technicians utilize equipment designed for the Western basin to bring you surface data solutions ranging from completions to production optimization.

Easily accessible data allows analysis to begin immediately so we've implemented remote real-time web data access. Our surface data applications are highly portable to enable our teams to access locations inaccessible by conventional modes of transportation.

- > Real-time or memory data capture
- > Pressure transient (PTA) data capture
- > Electronic flow measurement (EFM) production testing including dry gas flow meters
- > Perforation in-flow detection (PID)
- > Surface casing vent flow (SCVF)
- > Packer isolation tests
- > Liquid and gas critical injectivity monitoring
- > SCADA verifications
- > Pipeline pressure testing
- > Interference testing
- > Frac induction testing (FIT)
- > Strainer nipple data tool (SNDT)
- > Remote wireless data transfer / cellular and satellite (RDT)
- > Downhole gauges with surface read-out (DSRO)
- > Live Data Drop-Spool (LDDS) Real-time BHP / BHT

 **LONKAR**

Great People. Great Results.
